

# Hassle-free broadband for serviced properties

## Hyperfast broadband is a necessity

Connectivity matters, even when you're away from home. Our serviced apartment offering provides your guests with hyperfast broadband speeds and access to 24/7 customer service.

A poor connection can have a massive impact on retention. With us, it's gold-standard all the way. 33% of leisure travellers would not return to a hotel that offered inadequate internet access. This number rises to 67% for business guests. Don't take that risk.

“

*With a variety of guests that include long lease clients, contractors and international students that require a reliable connection, working with a dependable ISP is critical for SACO. That is why Hyperoptic's network backed by 24/7 customer service was chosen.*
